

About Almco

Almco is your state-of-the-art manufacturer of vibratory deburring, washing, cleaning and metal finishing products.

With over 60 years in the vibratory deburring and metal finishing industry, we strive to exceed our customers' expectations by providing comprehensive product lines and service at competitive prices.

Batch tubs are a perfect choice for finishing large, or delicate FDM parts. The aggressive action of these machines is ideal when shorter time cycles are required.

And, with a simple change of media, you can de-burr and polish metal parts.

How is the Almco Unique?

Selection of a vendor knowledgeable in the vibratory deburring and metal finishing industry that offers a wide range of equipment types is critical to achieving your finishing goals in the most efficient manner.

ALMCO employs a complete laboratory with qualified staff to sample-process your parts.

Personalized service and knowledgeable staff ensures consistent, high-quality results for all your vibratory deburring, parts washing, and industrial finishing needs.

Benefits of Vibratory Finishing

- Low costs – virtually labor free finishing
- Works with all FDM Materials
- Divider allows for smoothing and polishing
- Ideal replacement for hand finishing
- Automated cycles
- Minimal distortion of part geometry
- Long life

Almco Model	H.P.	Cubic Foot Capacity	Tub Size	Voltage
VB-1615	3	2.5	15 x 16 x 16	230 or 460
VB-1631	5	5	30 x 16 x 16	230 or 460

- **Wet or Dry Processing**
- **Integral Constant Speed Drive**
- **Variable Pitch Sheave from 1400 – 2000 VPM**
- **Variable Amplitude from 1/64” to 1/4” of up and down action**
- **Sound Deafening Enclosure**
- **1” thick cast polyurethane lining**
- **NEMA 12 enclosure equipped with start/stop buttons**
- **LCD Timer for process repeatability time cycle control**
